PROFESSIONAL SUMMARY

Flutter Developer with **2.5+ years of experience** building and deploying **25+ production-grade cross-platform mobile applications** for Android and iOS across healthcare, construction, logistics, CRM, AI automation, e-commerce, and social networking domains. Skilled in **Flutter, Dart, Firebase, REST API integration, scalable mobile architecture, performance optimization, payment gateway integration, and real-time systems**. Experienced in leading development teams, managing production deployments, and delivering business-focused mobile solutions in Agile environments.

SKILLS

- **Mobile Development:** Flutter, Dart, Android (Native), iOS (Swift)
- **Backend & Database:** Firebase, Supabase, Node.js, MongoDB, MySQL, PHP
- **Architecture & State Management:** GetX, Provider, REST API Integration, Clean Architecture
- **Integrations & Services:** Google Maps API, Razorpay, Cashfree, PhonePe, Push Notifications, Firebase Authentication
- **AI & Advanced Features:** ML Kit, OpenCV, Face Recognition, Real-time Tracking
- **Tools & Platforms:** Git, GitHub, Jira, Android Studio, Xcode, Agile/Scrum
- **Deployment:** Google Play Console, Apple App Store Connect

EDUCATION

Bachelor Of Technology (B.Tech.) in Information Technology

Park College of Engineering and Technology, Coimbatore - **August 2019 to July 2023**

CGPA: 8.26 / 10

PROFESSIONAL EXPERIENCE

Application Developer – Nulinz Technology, Salem

February 2024 – Present

- Engineered and deployed **25+ production-grade Flutter applications** for **Android and iOS** across **healthcare, construction, logistics, CRM, AI automation, and e-commerce domains**.
- Improved **application performance by 30%** using **optimized state management, lazy loading, API optimization, and memory optimization** techniques.
- Led a team of **5 Flutter developers**, handling **sprint planning, code reviews, release management, and technical mentoring**.
- Designed **scalable mobile architectures** using **GetX, Provider, Clean Architecture, MVVM, and feature modularization**.
- Integrated **secure REST APIs, Firebase Authentication, Firebase Cloud Messaging (FCM)**, payment gateways (**Razorpay, Cashfree, PhonePe**), and **real-time synchronization systems**.
- Implemented **live GPS tracking, push notifications, AI-powered facial recognition, deep linking, and real-time chat systems** in production applications.
- Managed **Google Play Store/App Store deployments, production monitoring, and post-release maintenance** in **Agile/Scrum environments**.

KEY ACHIEVEMENTS

- Developed an **AI-powered facial recognition attendance system** for construction labour management, automating attendance and salary calculation workflows.
- Promoted to **Senior Flutter Developer** for delivering high-performance mobile applications and leading critical project development initiatives.
- Architected scalable mobile solutions integrating **AI systems, real-time tracking, secure payments, cloud-based workflows, multi-role business operations and real-time communication systems**

FEATURED PROJECTS

Onstru Super – Social Media, E-commerce, and Job Platform

Tech Stack: Flutter, GetX, Laravel, AWS S3, Cashfree, Deep Linking, Firebase, Notifications.

Features: Architected a cross-platform super app integrating **20+ modules** including social media, e-commerce, job management, advertisements, and real-time chat systems. Improved transaction success rate by **95%**, increased user engagement by **40%**, and reduced screen load time by **30%** through optimized state management and reusable architecture.

apps.apple.com/us/app/onstru/id6748594477 (iOS)

DLR – AI Construction Labour Management App

Tech Stack: Flutter, TensorFlow, OpenCV, ML Kit, Python, Firebase, PHP, MySQL.

Features: Engineered an AI-powered attendance and workforce management system using facial recognition technologies for automated labour tracking and verification. Improved attendance accuracy by **95%**, reduced manual monitoring efforts by **60%**, and increased operational efficiency by **40%** through automated workflows and real-time reporting systems.

Link: play.google.com/store/apps/details?id=com.onstru.dlr (Android)

AI@site – AI-Powered Construction Assistant

Tech Stack: Flutter, Python, FastAPI, RAG, Gemini AI, Swagger.

Features: Developed an AI-powered site assistant leveraging RAG architecture and Gemini AI models to provide real-time project insights, intelligent document retrieval, and workflow automation. Reduced manual documentation search time by **70%** and improved on-site productivity by **45%** through AI-assisted operations.

Drivers Deck – Driver Sourcing and Tracking Platform

Tech Stack: Flutter, Laravel, Razorpay, Live GPS Tracking, Google Maps API, Multilingual Application.

Features: Built a driver sourcing and live tracking platform connecting customers with acting and permanent drivers using real-time GPS monitoring and secure hiring workflows. Improved driver allocation efficiency by **45%** and enhanced customer operational experience by **35%** through optimized logistics and tracking systems.

Link: play.google.com/store/apps/details?id=com.driversdeck.app (Android)

DacDiag – Digital Healthcare Consultation Platform

Tech Stack: Flutter, Agora SDK, Firebase, Video Calling, Healthcare Management.

Features: Developed a healthcare platform supporting secure online appointments, video consultations, and medical report sharing for patients and doctors. Improved consultation accessibility by **50%** and reduced manual appointment coordination efforts by **40%** through real-time healthcare communication workflows.

ADDITIONAL PROJECTS

Worked on multiple production-grade mobile applications across construction, healthcare, e-commerce, logistics, CRM, education, and social networking domains, including **CogoSmart**, **Ayush Clinic**, **Rootments**, **Catbuild**, **Expert Internal**, **Onstru Mart**, **Onstru Porter**, **Lucky Matrimony**, **Velan Calendar**, **Merapayment**, and **Nulinz Community**.

CERTIFICATIONS

- **Google Play Academy – Store Listing Certificate (2025)**
Learned App Store Optimization (ASO), Play Store listing optimization, keyword strategy, user acquisition techniques, and conversion-focused listing practices for mobile applications.
- **Software Engineering & Agile Job Simulation Virtual Internship**
– JPMorgan Chase & Co. via Forage (October 2023)
- **AI Chatbot Development for Banking Industry – IBM (February 2023 – April 2023)**
Developed an AI-powered banking chatbot solution using conversational AI concepts and workflow automation.
